

The ORIGINS Project Sample Drop-offs as of 20th August 2020

The ORIGINS Project is following the advice of the Department of Health regarding the COVID-19 pandemic, and restrictions have now eased significantly. However, we all still need to be cautious and follow protocols.

The ORIGINS office at Joondalup Health Campus (Suite 213) is once again accepting ORIGINS samples – deliveries need to be made on weekdays before 1.30pm.

If you would like an ORIGINS team member to meet you at your car when arriving at Suite 213 with your samples, please phone 9408 3118 and someone will come down and meet you to collect your sample/s from you.

Our courier collection service, which was available during lockdown, has now been limited and is only available for select situations. Please get in touch with us if you are wanting to find out more about this service.

Alternatively, you can continue to choose from one of the options below to drop off your samples.

Please note the Joondalup Private Clinical School is still not staffed or accepting samples. Also note that JHC has new COVID-19 screening procedures in place – see [the JHC website](#) for more information. These procedures do not apply to the ORIGINS offices.

Fresh Urine and Fresh Breast Milk Samples

Option 1: Place your samples into the Western Diagnostic Pathology (WDP) envelope provided and drop the envelope off to a WDP Centre in the Perth Metro area on **weekdays before 10am**. Please note that some collection centres are closed so please check the website for one that is open near you. [Find a WDP Centre near you](#)

Option 2: If you do not have a WDP envelope you can only drop your urine and breast milk samples to specific Western Diagnostic Pathology Centres. Please choose from one of the following centres.

Please note: some of the centres listed below may still be closed, so if you do need to visit one of these centres specifically, because you don't have a WDP envelope, please call them prior to visiting.

Frozen Stool and Room Temperature Dust Samples

WDP centres are unable to receive these samples. Please follow the instructions on your sample collection bag and deliver it to Suite 213 as outlined above.

Thank you for your continued support!
