

The ORIGINS Project Sample Drop-offs as of June 2021

The ORIGINS office at Joondalup Health Campus (Suite 213) is once again accepting ORIGINS samples. All samples can be dropped off to the ORIGINS office on weekdays between 9.00am and 1.00pm.

If you would like an ORIGINS team member to meet you at your car when arriving at Suite 213 with your samples, please phone 9408 3118 and someone will come down and meet you to collect your sample/s from you.

Our courier collection service is only available for select situations. Please get in touch with us if you are wanting to find out more about this service.

Alternatively, you can continue to choose from one of the options below to drop off your samples.

Please note the Joondalup Private Clinical School is still not staffed or accepting samples. Also note that JHC has new COVID-19 screening procedures in place – see [the JHC website](#) for more information. These procedures do not apply to the ORIGINS offices in Suite 213.

Fresh Urine and Fresh Breast Milk Samples

Option 1: Place your samples into the Western Diagnostic Pathology (WDP) envelope provided and drop the envelope off to a WDP Centre in the Perth Metro area on **weekdays before 10am**.

**We understand life is busy with a new baby. While we prefer sample drop-offs before 10am - to aid with efficient processing - WDP can receive samples later in the day if necessary. Please check the relevant WDP centre for their opening hours. ** [Find a WDP Centre near you](#). If you are dropping your fresh samples to the ORIGINS office instead of WDP, there is no need to be there prior to 10am. You can do this between 9am and 1pm.

Option 2: If you do not have a WDP envelope you can only drop your urine and breast milk samples to specific Western Diagnostic Pathology Centres. Please choose from one of the following centres.

Please note: Please call the WDP centre directly before visiting to ensure they are open and accepting samples.
