

The ORIGINS Project Release of Biological Information

Project Title:

Lay Title:

Scientific Title:

Chief Investigator:

Title:

Name:

Position:

Institution:

Address:

Telephone:

Email:

Human Research Ethics:

Name of HREC Approval Institution/Site

HREC Approval Reference

HREC Approval Date

HREC Expiration Date

Project background:

Biological sample(s) and volumes requested:

***Biobank will add details of samples to be released here once sample collection is complete and final numbers are available.*

Has the analysis of these samples been approved by the ORIGINS Scientific Committee and Biobank?

***Please ensure the analysis of these samples has been discussed in the project application stages and approved by the Scientific committee and ORIGINS Biobank.*

If the use of these samples has not previously been discussed and approved (new project or protocol addition/amendment), relevant approval processes are obligatory to sample release being approved

Analyses and scientific rationale: *Include evidence of validation of the analytic platform; include evidence that the specific analyte/s is measurable in the proposed Biological Information*

Viability and freeze/thaw influences:

Quality control: *Describe the method(s) of quality control (e.g. triplicate testing, control samples)*

Additional analyses: *Is there potential for other tests to be conducted on the sample(s) at the same time?*

Processing and Analysis facility(ies): *Provide details of facility(ies) and justification for use*

Transport of samples:

Funding: *Detail the costs of analysis and who will be funding these costs (including aliquoting and preparation etc. if necessary)*

Broader use of data: *Please provide evidence of the value of this assay/test to the wider ORIGINS Project research community*

There is a requirement to:

Return excess samples:

Return derived data:

Payment of ORIGINS Access Fees, as determined: *Biobank to calculate after receiving details of sample numbers from sub-project.*

According to the Biobank Cost Recovery Plan, the Access Fee for provision of the requested samples would be as per the below table.

Item	Cost
Total cost including recommended reduction	

This form requires endorsement via the ORIGINS Executive and final sign off by the ORIGINS Directorate.
